Audit

Are my internal controls good enough?

CSP can help answer your controls question with our Audit Services.

Gap analysis

A point in time assessment of your status against your chosen cyber security framework:

- ISO27001
- Cyber Essentials
- NIST Cyber Security Framework.

We will:

- assess your policies, people, technology and process security controls
- provide a summary report of:
 - areas of good practice
 - opportunities for improvement
 - potential non-compliance.

Implementation

Following the identification of gaps, we will design and recommend controls to improve your cyber security status.

We will recommend and design:

- plans to improve security posture
- policies and processes
- technical controls.

Throughout the engagement we will provide:

- progress reports
- templates as required.

Mock audit

A 'practice-run' audit engagement, against your chosen cyber security Framework:

- ISO27001
- Cyber Essentials
- NIST Cyber Security Framework.

We will provide:

- a consultant to simulate an audit with your staff
- a scope and pre-defined questions
- a summary report of:
 - areas of good practice
 - opportunities for improvement
 - potential non-compliance.

Cyber Assurance

Can I with confidence, say our controls are robust?

CSP can help answer your confidence question with our Assurance Services.

Gap analysis

A security control maturity assessment against a cyber security framework of your choice including:

- NCSC cloud security principles and guidance.
- NCSC Cyber Assessment Framework (CAF)
- Cloud Security Alliance Cloud Controls Matrix
- your internal policies and standards.

We will:

- assess your security controls categorised as people, policy and process
- provide a summary report of:
 - areas of good practice
 - opportunities for improvement
 - potential non-conformances.

Implementation support

To mitigate any gaps or non-conformances, we will design and recommend controls to improve your cyber security posture.

We will design and recommend:

- plans to improve security maturity
- policies and processes
- technical controls.

Throughout the engagement we will provide:

- progress reports
- templates as required.

Consultancy

How do I find security subject matter experts?

CSP can help provide security subject matter experts with our Consultancy Services.

Consultancy options

Our consultants provide independent and pragmatic cyber security advice and guidance tailored to your business.

We have extensive experience across a wide range of skills:

- security bid writing
- technical security
- data protection
- risk assessment
- supply chain assessment.

Security programme and project management

Our consultants can lead programmes and projects to help improve your security status.

We have experience across organisations of all sizes, managing projects delivering real business benefits.

Projects we cover:

- security implementation
- business transformation
- security maturity improvement.

Security Management as a Service

We act as security managers for your business, on a full-time, part-time or ad-hoc basis, to let you run your business.

We will:

- be part of the team to secure your business
- help build and maintain your security controls
- write policies, processes and procedures
- develop reporting metrics
- take responsibility for reporting on compliance.

Cloud Security Consultancy

Is the cloud right for my business?

CSP's Cloud Consultancy Services can help answer your question.

Pre-cloud consultancy

We will help you answer:

“is moving to the cloud right for my business?”

We will:

- discuss with you, your business requirements to move to the cloud
- identify cloud appropriate cloud models
- identify cloud security requirements

We will provide a report detailing which cloud solution models may be appropriate for your business and recommend cloud models, such as Software as a Service (SaaS), Infrastructure as a Service (IaaS), Platform as a Service (PaaS).

Post-cloud consultancy

We will help you answer:

“is the cloud still right for my business?”

We will:

- discuss with you, your current cloud solution
- review your existing cloud security design
- recommend security control improvements
- highlight alternative technical solutions where appropriate.

We will provide a report with cloud security control improvements and alternative cloud models such as Software as a Service (SaaS), Infrastructure as a Service (IaaS), Platform as a Service (PaaS).

Data Protection

How do I find data protection specialists?

CSP can provide subject matter expertise with our Data Protection Services.

Gap analysis

An assessment of your security controls using relevant legislation:

- UK Data Protection Act 2018 (DPA)
- The UK General Data Protection Act (UK GDPR)
- Privacy & Electronic Communications Regulation (PECR)
- Freedom of Information Act 2000
- Human Rights Act 1998.

We will:

- assess your policies and processes
- provide a summary report of:
 - areas of good practice
 - opportunities for improvement
 - potential non-compliances.

Implementation support

A defined series of engagements, using relevant legislation:

- UK Data Protection Act 2018 (DPA)
- The UK General Data Protection Act (UK GDPR)
- Privacy & Electronic Communications Regulation (PECR)
- Freedom of Information Act 2000
- Human Rights Act 1998.

We will:

- help design your people, policy and process controls
- provide a summary report of:
 - areas of good practice
 - opportunities for improvement
 - potential non-conformances.

Governance, Risk & Compliance

How do I implement security risk in my business?

CSP's Governance Risk and Compliance Services can answer your security risk question.

Governance gap analysis

A point in time assessment of your governance controls using best practices and industry recognised standards.

We will assess policy compliance for:

- risk assessment
- software governance
- business continuity governance
- change control boards.

We will provide reports highlighting:

- areas of good practice
- suggested improvements
- potential non-compliances.

Risk assessment

A defined series of engagements reviewing risk assessment methods.

We will:

- review your risk assessment framework
- perform cyber security risk assessments
- recommend improvements to the risk assessment methodology where appropriate.

Throughout the project we will provide:

- progress reports
- best practice templates.

Compliance assessment

A defined series of engagements using your chosen framework.

We will:

- assess your compliance framework: using industry recognised frameworks, such as;
 - ISO27001,
 - NIST Cyber Security Framework,
 - Cloud Security Alliance Cloud Controls Matrix.

Throughout the engagement we will:

- provide reports
- areas of good practice
- recommend improvements.
