Why cyber
assurance?

Cyber assurance provides confidence in your applied security controls.

Business challenges

- investment and budget constraints
- Board perception
- business reputation
- shareholder perception
- competitive advantage
- business acquisitions

What is cyber assurance?

A CSP consultant will inspect your security controls using our assurance methodology and provide a point in time assessment.

Frameworks we use for assurance

- National Cyber Security Centre (NCSC) frameworks and principles
- NIST Cyber Security Framework
- Cloud Security Alliance Cloud Controls Matrix

Our assurance skills will also apply to assessments using internal or bespoke standards.

Our experience

CSP's highly experienced consultants have extensive backgrounds in inspecting controls against NCSC, NIST and other international standards.

About our
cyber assurance
services

Gap analysis service

A point in time assessment to establish your cyber security baseline. This will cover your internal processes and in-house systems.

Using your chosen framework, we will assess your policies, people, process and technology controls.

You will receive a report:

- highlighting areas of good practice
- suggesting areas for improvement.

About our
cyber assurance
services

We will use the results from the gap analysis service as input to our implementation support service as needed.

Implementation support service

We will help you to:

- review and enhance your policies, processes and procedures
- develop any missing documentation where necessary

Throughout the project you will receive regular progress reports.

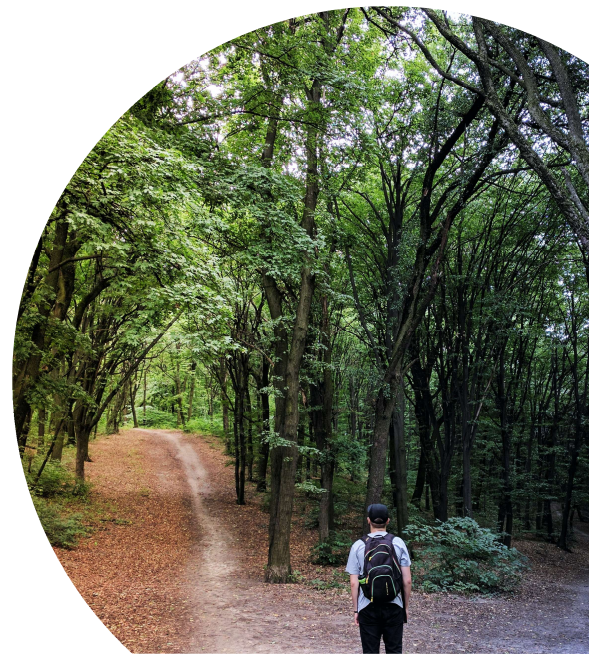

Benefits to you

- Work with subject matter experts
- Enhance cyber security knowledge in your team
- Provide assurance to:
 - the Board
 - customers
 - shareholders
 - insurers
 - employees
 - suppliers.
