Data protection challenges

An organisation's data must be protected at all times. This includes organisational data as well as personal data.

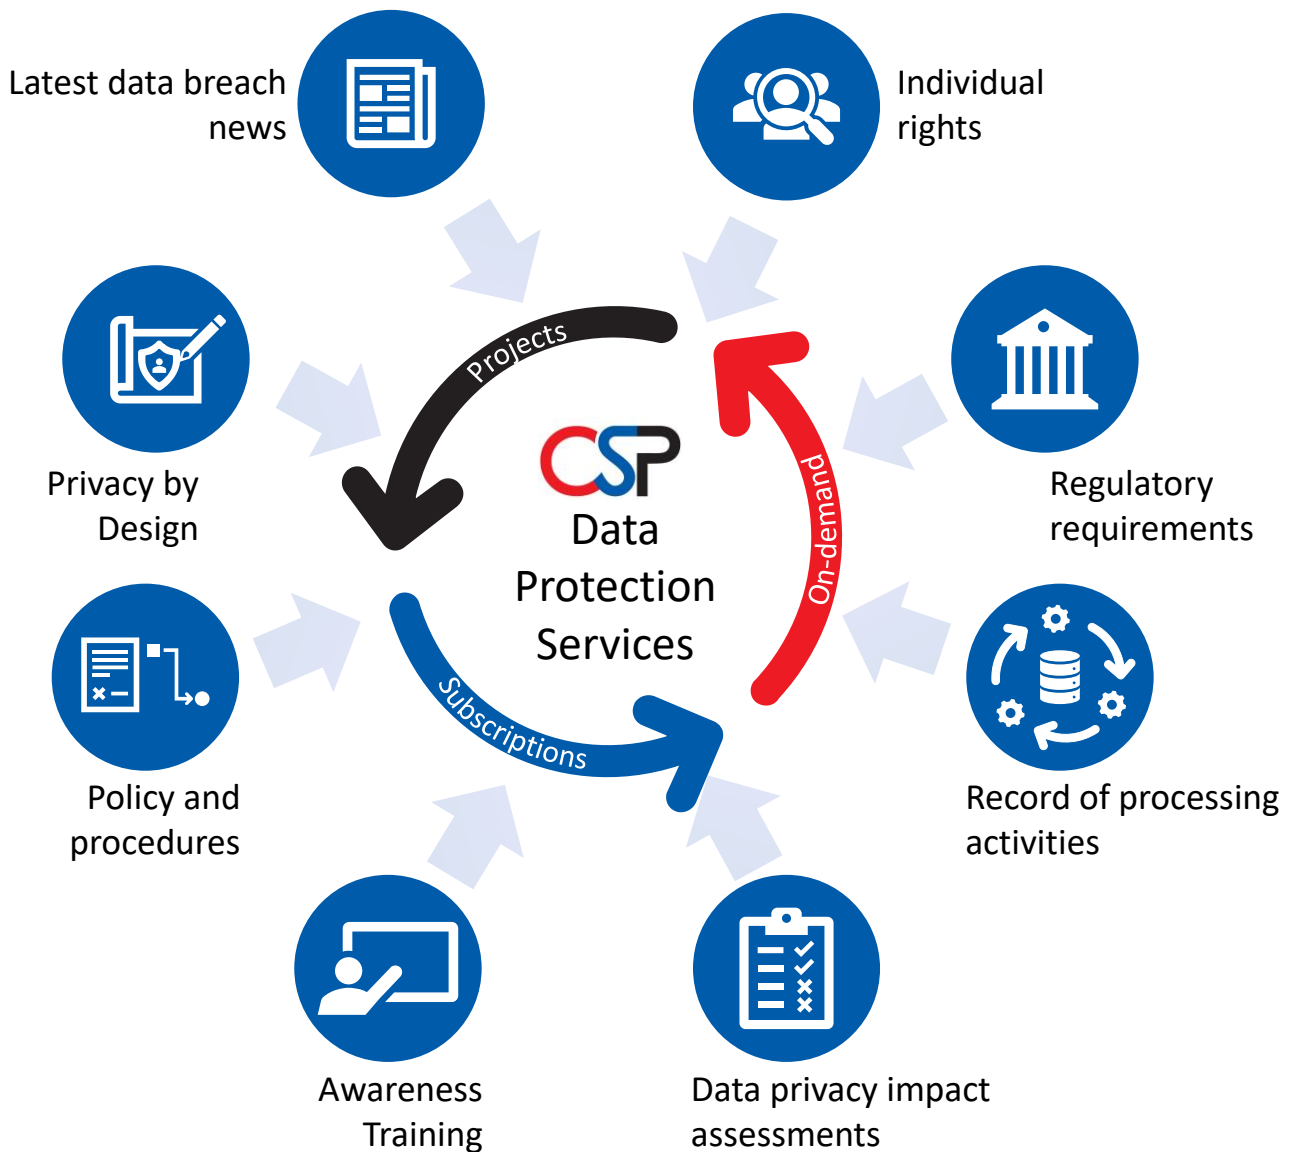

Data protection covers a wide range of challenges:

- Data privacy functions needed to meet the key principles of:
 - The Data Protection Act 2018
 - UK GDPR
 - Freedom of Information Act 2000
- contractual or regulatory requirements
- reputational damage
- data breach prevention and detection
- data quality
- customer satisfaction
- economic efficiencies.

Data protection topics

Data protection management

Data Protection as a Service (DPaaS)

CSP take away the headache of data protection and manage it for you.

On-demand services

Access to CSP experts in data protection to help you:

- carry out data privacy impact assessments (DPIAs) and other related data protection tasks.
- complete client or suppliers' data protection questionnaires

Project management

CSP can take the lead on your data protection bespoke projects such as:

- Cloud based data protection reviews
- Organisational data protection reviews
- Reducing costs on full-time resources.

Data protection training

Our subject matter experts deliver workshops as part of a data protection programme. An example of our data protection training options is described below.

Awareness Training

A high-level session to bring the data protection topic to a wide audience

Workshop series

Intense classes that last 1-3 hours.
Designed to help your audience learn a specific data protection topic

Training delivery

All training types are delivered either online or in-person.

We provide you with a certificate of attendance for every person in attendance.
